Strategic Engineering Leader 20+ years of experience driving internal and external development programs, aligning IT execution with business value, and optimizing technology investments through structured intake and delivery governance.

Proven track record in leading cross-functional teams across global enterprises to streamline IT portfolios, manage complex pipelines, MES and ERP transformations, integrating OT/IT platforms, and deploying scalable, validated systems in regulated industries. Skilled in aligning IT strategy with business goals, enabling compliant operations, process optimization, and platform standardization.

- **CORE SKILLS:** ✓ Artificial Intelligence (AI) & GenAI Solutions ✓ Agentic AI Implementation & Integration ✓ AI-Driven SDLC Transformation ✓ Agile Portfolio & Program Management (SAFe, PMI) ✓ AI Agents & Workflow Orchestration ✓ Technical Architecture & Platform Governance ✓ SPECT Team Leadership & Delivery Governance ✓ Scaling Engineering Pods. ✓ Career & Performance development. ✓ Managing Multiple Pods/Teams.

- **EDUCATION**

- M.Sc. in Engineering Management (MBA) | University of Marmara
- B.Sc. in Computer Engineering | University of Istanbul

CERTIFICATIONS

- Executive Leadership (Oxford, Saïd Business School) 
- Machine Learning Specialization (Stanford University) 
- Agile Coach | PRINCE2 Practitioner | ITIL Foundation | Scrum Master
- Microsoft MCP | Six Sigma Green Belt | Lean Agile Management

VOLUNTEER EXPERIENCE

Volunteer Coach | Prague Training Academy (2022–present): Delivered executive coaching on operations leadership, agile delivery, and technology strategy.

PROFESSIONAL EXPERIENCE

Delivery Manager | PwC | Prague | 2025 – Present

- Building and leading AI-driven software delivery teams across multiple clients within a multi-pod Agile delivery model.
- Managing and continuously improving the efficiency of Agile, Scrum and SPECT teams through data-driven delivery governance and operational excellence practices.
- Driving adoption of AI-assisted SDLC capabilities, including Agentic AI tools, engineering productivity solutions and delivery automation.
- Leading development and integration of AI agents supporting planning, requirements analysis, quality engineering, testing, reporting and delivery governance.
- Collaborating with Product Managers, Solution Architects and Engineering Leads to build scalable cloud-native solutions.
- Supporting business development, solution shaping, stakeholder management and technology strategy across multiple clients.

Consultant | Self Employed | Prague | 2024 –2025

- Provided consultancy services for multiple clients focusing on SDLC process improvements, delivery governance and engineering effectiveness.
- Delivered Agile transformation and coaching initiatives improving team performance and value delivery.
- Led Program Management engagements focused on delivery optimization, process standardization and technology transformation.
- Advised clients on Agentic AI implementation strategies and AI-assisted software engineering practices.
- Designed operating models, KPIs, governance frameworks and continuous improvement initiatives.

Head of Delivery | AccionLabs | Prague | 2023 – 2024

- Spearheaded a global transformation programme to modernize internal technology platforms, aligning IT delivery with product growth and risk control objectives.
- Led cross-functional squads (DevOps, Data, Security) to deliver internal platform capabilities across CI/CD, observability, and automation domains, using structured intake-to-deployment governance.
- Owned roadmap, prioritization, and release planning across 10+ internal development initiatives, with strong budget tracking and milestone forecasting.

- Oversaw engineering performance metrics and OKRs, reporting progress to senior product and business stakeholders.
- Supported business–IT alignment via workshops and agile ceremonies, improving visibility across development portfolios.

Sr. Global Engineering Manager | TDSynnex | Prague | 2021 – 2023

- Managed a portfolio of internal growth projects within the e-commerce solutions team, including regional SAP-to-Cloud transformations and backend platform standardization.
- Defined intake and scoping processes for country onboarding requests, ensuring data-driven evaluation of business requirements and risk exposure.
- Led cross-functional coordination (business analysts, architects, QA) to initiate and deliver internal IT projects under strict budget and timeline controls.
- Introduced agile portfolio tracking, improving predictability and stakeholder alignment across regions.
- Developed reporting dashboards (Jira, Power BI) for leadership to monitor internal dev initiatives and mitigate delivery risks.

E-Commerce Development Manager | TDSynnex | Prague | 2017 – 2020

- Managing multiple Development Teams in E-Commerce domain in Regional scope. Main responsibilities are providing 2nd and 3rd level support. for E-Commerce Web applications, which are producing approx. 30% of regional revenue.
- Backlog prioritization. Team I am managing is consist of internal and external resources and size wise between 12 to 18 developers in total.
- Collaborated with global teams on early digital transformation programs, identifying scalable solutions and proposing architectural concepts for future innovation service layers.
- Managed defect and deployment flows in financial applications integrated into SAP, ensuring readiness for phased rollouts across countries.
